

Medical Needs Policy

Senior Leader Review Lead : DSL, Karen Harper
Health and Wellbeing Lead,
Janet Goodman

Last Reviewed: January 2024

Review date: January 2025 - or as needed

For review by: HR/PDW

Introduction

This policy should be read in conjunction with other relevant policies:

Safeguarding and Child Protection Policy

Equalities Policy

Health and Safety policy

Aims

Sir William Borlase's Grammar School recognises and understands that some members of the school community may need help and support with the management of their medical needs and / or conditions. Whilst the primary responsibility for the health and wellbeing of a student remains with parents, the school has a duty of care to the student, and aims to do all that is reasonable and practical to support the student through discussion with the student, parents and any medical professionals.

Department for Education Guidance

From September 2014, Section 100 of the Children and Families Act 2014, placed a duty on governing bodies of schools and academies to make arrangements for supporting students with medical conditions, in consultation with health and social care professionals, students and their parents. This involves the development of Individual Health Care Plans for students with medical needs and / or conditions in accordance with the statutory [guidance](#) 'Supporting Pupils at School with Medical Conditions' (updated December 2015).

Key principles

Students' Rights & Responsibilities:

- to be valued
- to respect yourself and be respected
- to feel safe and respect the safety of others
- to use common sense
- to support others

Managing Medicines

For pain relief either paracetamol or ibuprofen will be provided.

This will be recorded in the Student Planner (for students in Years 7-11) and in the Medicine Provision record book.

If a student carries their own prescribed pain relief medication they need to ensure that they carry a daily dose only, that it is in the correct packaging and that it is handed to The Health and Wellbeing Lead each day.

Under no circumstances should pain relief medication or any other form of medication be shared with, or given to another student.

Medication is not held in school for students who can medicate outside the school day, for example, hay fever or twice daily antibiotics.

The school Health and Wellbeing Lead holds Medical Information which is part of the enrolment forms and confirms consent to administer paracetamol during the school day and on educational visits.

It is the responsibility of parents and students to ensure that their medication is in-date at all times.

Individual Health Care Plans (IHCP) Information

The school Health and Wellbeing Lead holds Individual Health Care Plans (IHCP) and ensures all relevant staff, such as the SENDCo, are aware of the IHCP

Any student (all year groups) prescribed a controlled drug, for example, a prescription painkiller, is required to see the school Health and Wellbeing Lead to discuss timings, storage etc. The student can access the medication as and when required via the school Health and Wellbeing Lead and this will be recorded in the Planner and on the Medicine Provision notebook.

The school Health and Wellbeing Lead will send a letter to parents at the start of each academic year asking for IHCPs to be updated and for any new information.

The school Health and Wellbeing Lead and Student Support will ensure that IHCPs are put in place at the earliest opportunity, after parental contact with the school, and following any medical diagnosis by a GP or Consultant.

The school Health and Wellbeing Lead maintains an up-to-date Health Care Register and associated medical documentation.

IHCPs are reviewed on an annual basis, or earlier if the student's needs have changed.

The school Health and Wellbeing Lead and any other relevant staff will liaise with parents, health and other professionals, staff and students, to ensure that information is managed sensitively and with the best interests of the student in mind.

Medication will be accessible as required.

If a student refuses to take a medicine or carry out a procedure parents and, where appropriate, medical professionals will be informed.

Medical Return to School Meetings

These are arranged for students who have had an accident or injury requiring external medical intervention, or if they are required to attend school on crutches on the advice of a medical practitioner, and / or following an operation.

Meetings take place before, or on the first day the student returns to school and involve assessing the student's safety on the school site / ability to move safely around the school site and consider any timetable or wider implications.

These meetings will involve the school Health and Wellbeing Lead and any relevant members of staff.

Roles and Responsibilities

The Local Governing Body will support the School in its effective implementation and monitoring of the Medical Needs policy and regularly reviews the policy and necessary training.

The Headteacher is responsible for the implementation of the policy on a day-to-day basis and has overall responsibility for the development of IHCPs

Staff will:

Support the Headteacher in the implementation of this policy

Be positive role models and promote positive behaviours by the way they speak to, and treat others

Know and understand the signs and symptoms of any medical conditions for relevant students

Engage in any relevant training to support the wellbeing and safety of students

Student Role

Students :

Are encouraged to self-manage and self-medicate their medical conditions wherever possible.

Should carry their own medication devices, for example, an inhaler, auto-injector pen, diabetic testing kit.

Who are taking medication that can be administered out of school hours are required to do so, for example, hay fever medication, eye drops and twice daily antibiotics. This type of medication will not be held in school.

Parental Role

To make the school aware of any new medical concerns or diagnosis, or any changes to their child's medical circumstances.

To keep the school up-to-date regarding any on-going treatment and / or additional support required.

To complete and return to the school Health and Wellbeing Lead, an IHCP for their child if they have any of the following conditions : asthma, eczema, diabetes, epilepsy, an allergy requiring an auto-injector, or any other medical condition that may require additional support and / or medication to be held in school.

To contact the school to arrange a medical return to school meeting, prior to their child's return to school.

To ensure that all medication provided is in date, clearly labelled, in the original packaging as dispensed by a pharmacist, and contains full instructions for administration, dosage and storage.

To ensure that their child collects their medication when it is due to expire and replaces it promptly.

To aim to ensure that routine medical and dental appointments are scheduled out of school hours, including vaccinations.

To ensure that any physical or mental health conditions are declared on the medical information forms for any residential visits.

To make sure that parent contact details are fully up-to-date and inform SWBGS via parents@Swbgs.com of any changes immediately. Ensuring their child only attends school on crutches when the crutches are provided by a medical practitioner / hospital and related to a specific injury.
